**HINTS TO MOTHERS.**  
**"Cleanliness is Next to Godliness" in Feeding Babies.**  
 Your baby came from a world of perfect cleanliness. He has been used to perfectly pure and wholesome food. He has a perfect right to expect it after his arrival in this world. If the mother can furnish it herself, the baby is fortunate, for he will then be served in the most approved and sanitary way.  
 If, however, he must be a "bottle-fed baby," remember that his life may depend upon absolute cleanliness.  
 Use only the cleanest, purest and freshest of milk. See that it is clean and cool when you get it. Put it on ice immediately. During hot weather ice is absolutely essential for the preservation of milk. A little money spent for ice may save a large doctor's bill later. Never allow a fly around your baby, his food, or his bottle.  
 As soon as the bottle of milk is finished, wash it thoroughly with cold water, using a bottle brush. Then clean with hot water and borax (a tablespoonful of borax to a pint of water), and turn it upside down in a clean, sunny place away from flies.  
 Never let the baby nurse again from the milk remaining in a bottle after he has finished it once. Stale milk curdles in the bottle will become poisonous in a few hours, and may contaminate fresh milk coming in contact with them.  
 Always boil the bottle thoroughly in water to which a little soda has been added, before putting fresh food into it. The easiest way is to have as many bottles as the number of daily nursings, so that all may be sterilized together.  
 The simpler the nipple the better. Never use a nipple to which a long tube is attached. It can not be kept clean and will certainly cause bowel trouble. As soon as the bottle is finished, remove the nipple, turn it inside out over the finger, and clean with a brush, used only for this purpose. After use, always boil the brush. Keep the clean nipples in a covered glass filled with fresh borax water. Always rinse the nipples, as well as the bottles, in boiling water before using again.  
 Do not put the nipple in your mouth to determine the wormth of the milk. Let a few drops fall from the bottle on your wrist. If the milk is not hot for your wrist, it is too hot for the baby.  
 Always observe the utmost care for cleanliness in all details. Because other babies have survived flies and filth is no reason that yours will. Bear in mind that eternal vigilance is the price of cleanliness, and baby's health is the reward for both.

**OLD HICKORY CHIPS.**  
**A General Mixture Designed for The Busy Readers.**  
 In 1852 the Whigs did not realize that their party was dead until they received an invitation to the funeral in November of that year. History is about to repeat itself.  
 When Tom Platt made Roosevelt Vice-President he certainly had no conception of what he was starting. Good baseball players, like good politicians, now look forward to a residence in Washington as a reward.  
 Prospects for the cause of women's suffrage are being rapidly improved through an instinctive recognition of the fact that it is easy to get a man to make promises when he is cornered.  
 Seven little governors, where have they gone? Seven dark horses came and they all got on!  
 The Spanish aviator who was wrecked by a flock of locusts should congratulate himself that he wasn't flying in a New Jersey skeeter belt.  
 A New York health culture faddist says that to remain beautiful women should talk to themselves. But those who remain beautiful don't have to.  
 As Mrs. Malaprop would say, it's the proverbial case of the irresponsible force and the immovable body at Chicago.  
 And in the meantime the personally conducted Ananias Club membership has reached high tide and the private census of undesirable citizens has grown beyond recognition.  
 There's a difference between a business administration and commercializing a National convention.  
 First, the Republican party divided into progressive and conservative factions. Then the progressives sub-divided into LaFollette and Roosevelt men. Now the Roosevelt men have divided into bolters and non-bolters. By and by the bolters will divide into a colonel and another fellow, after which the colonel will go off and disintegrate himself by working off his grouch.  
 "Early to be bed and early to rise," makes a long day for swatting the flies.  
 Although he had committed his crime a year before, a hold-up man was recognized by his victim and arrested. The moral is that a man with that kind of a face has no business to go into the hold-up business.  
 Here is a divorced couple quarreling about the ownership of the pet bull-dog. This is at least better than having the feeling of tender children wounded by court proceeding and the ruined home.  
 "Bacillus glycoester" is the name of the newest advance agent of longevity, which has had many names, since men began to dally with retorts, test tubes and germs.  
 A man who undertakes to support Colonel Roosevelt must be agile in keeping on the dark side of the spotlight machine.  
 We begin to think that Harry Thaw doesn't like Mrs. Matteawan's cooking.  
 The trust that really could dissolve is the sugar trust, and it has too much sand.  
 A former Seattle livery stable man has just sold a flock of Alaska mines to the Guggenheims for \$2,000,000. He can now follow the horses again.  
 Thoughtless admirers always try to compel a man who is having a fight of his life to waste an immense amount of precious time shaking hands.  
 A Senate doorkeeper says that the colonel was stung in Africa by a crazy "moonfly." Well, at least he wasn't bitten by a sleeping sickness bug.  
 A New York crook, we read, kept a stiff upper lip when sentenced to sing the other day for the eleventh time. He has the courage of his convictions.  
 Doctor Cook has returned to start a lecture tour. He has a splendid opportunity to get even with the colonel by swiping his press agent.  
 Lil Russell has missed a lot of mighty good advertising by not accompanying her new husband on his honeymoon trip.  
 In baseball as in politics a winning pitcher goes to the well once too often.  
 Mr. Taft may be down on college yells, but where would he be without the roosters?  
 Meanwhile the grand old party elephant would enjoy a vacation from his diet of peanut politics.  
 Charles W. Morse's movements are so closely watched by Wall street that it is doubtful he could buy a cigar without being suspected of designs on the tobacco trust.

**VALUE OF COWPEAS.**  
**Every Farmer Should Arrange to Plant a Large Crop.**  
 Again we desire to remind the farmers of the importance of planting every available, cultivated acre to cowpeas. They are valuable for the following reasons:  
 They are fairly good human food. They are one of our most nutritious foods for stock.  
 The peas are alone worth from \$5 to \$20 per acre.  
 Cowpea hay is easily worth \$20 per ton.  
 If left on the land and turned under the vines are worth from \$5 to \$15 per acre as a fertilizer.  
 The roots and stubble are worth \$2 to \$4 per acre as a fertilizer.  
 The vines, roots and stubble furnish humus (vegetable matter) something nearly all lands are deficient in.  
 This humus helps to make the land cultivate easily. It absorbs and holds moisture that will aid a crop to continue its growth during a drought.  
 Humus furnishes the conditions necessary for the existence of beneficial bacteria.  
 The shade of pea vines in the formation of valuable nitrates in the soil is helpful.  
 Pea vine roots are good subsoilers. They go to considerable depths, opening up the earth so air and water can make a deep soil.  
 Peas get some of their nitrogen (amonia) from the air, free of cost to the farmer, so that very little nitrogen is needed for their fertilization except for poor soils.  
 Peas draw heavily upon the supplies of phosphoric acid and potash; therefore these substances should be supplied to them in fertilizers. Many pea crops fail for lack of phosphates and potash.  
 Cowpeas fit in well in nearly all systems of rotations of crops. They are well adapted to growing among corn and after small grain harvested in the spring.  
 Every farmer should arrange at once to plant abundantly of this important crop. Plant some on poor land for turning under; plant some for hay; plant some for grazing by horses, cows, hogs and other stock; and by all means plant, fertilize and cultivate a few acres for seed peas so you will not have to buy at high prices next season.  
 Nearly everything said above about cowpeas is also true of soy beans. The beans excel in being a little more valuable as stock food, a little better adapted to wet soils, stand droughts some better and usually make slightly larger yield as grain and hay.  
 C. R. HUDSON,  
 State Agent.

**WHERE THE OLD PIANOS GO.**  
**Far-Away Markets Found For These Taken In Trade.**  
 What becomes of all the old pianos? Thousands of new pianos are sold every year to the greater number of those who already have old musical instruments. The salesman allows a liberal price for the old piano in trade, accepts a little cash, and takes the balance on monthly payments. Now, while he has sold one piano he has just as many on his hands as before, for he has accepted an old one. What becomes of it? He does not care to sell it to some one who has never had a piano if he can avoid it, for if the process of trading continued he would soon be following himself around in a circle and there are no dividends in that. He must find a market for the old musical instrument. To do this he repairs and revarnishes the old piano, boxes it, and, with hundreds of others, it is shipped to South America, Africa, Asia and other benighted portions of the world, where it is sold to the natives, who yearn for music and whose ambition is to drum out tunes on an instrument of their own. These pianos are sold for a small amount down and the balance in monthly, sometimes weekly payments extended over a long period of time. In this way the dealer gets back not only the price he allows for the old piano in the first place, but the cost of repairing, boxing and shipping, with interest added to each of the charges.—Baltimore Sun.

**Are You Blue and Worried?**  
 Nervous? Some of the time really? Catch cold easily and frequently suffer from biliousness or headache? The reason is that your system does not rid itself of the poisons in the blood, just as impossible as it is for the grate of a stove to rid itself of cinders. The waste goes to exactly what the cinders do to the stove; make the fires burn low until enough cinders have accumulated and then prevent its burning at all. Your liver is sluggish—you are dull and heavy—sleep does not rest, nor is food appetizing. In this condition illness develops. Doctor Pierce's Golden Medical Discovery eradicates the poisons from the body—a glyceric alterative extract made from bloodroot, golden seal and mandrake root, stevia and queen's root, without the use of alcohol. No matter how strong the constitution the stomach is apt to be "out of kilter" at times; in consequence the blood is disordered, for the stomach is the laboratory for the constant manufacture of blood.  
 "I have taken about six bottles for years from chronic trouble, catarrh, indigestion, constipation, low spirits, nervousness and nervousness—at times I would faint, but I am able to get up again. I was under many different doctors' care and would not have been able to get up again. I was under many different doctors' care and would not have been able to get up again. I was under many different doctors' care and would not have been able to get up again."
